PROFESSIONAL SUMMARY

Performance-driven UI Engineer (Frontend) with 5+ years of experience building scalable, production-ready web interfaces. Specialized in translating high-fidelity UI/UX design systems into pixel-perfect, interactive frontend experiences. Deeply focused on component-based architecture, responsive design, and fluid interaction frameworks, with a proven track record of maintaining live client projects through clean, developer-friendly implementation.

CORE SKILLS

Frontend Architecture & Frameworks: React.js, Vue.js, Component-Based Architecture, JavaScript (ES6+), State & Routing Basics (React Router), HTML5, CSS3 (SCSS/SASS), Tailwind CSS

Design & Systems: UI/UX Design, Design Systems (Figma Components, Advanced Auto Layout, Token Variables), Interaction Design, Visual Hierarchy, Typography, Wireframing

Platforms & Workflows: Shopify (Liquid), WordPress, Git/Version Control, Developer Handoff Optimization, Cross-Browser Compatibility, Accessibility (WCAG Basics)

PROFESSIONAL EXPERIENCE

UI Engineer / Web Designer — Tech Pratish Software Solutions Pvt Ltd

Sept 2020 – Present | Mohali, India

- Architected and deployed 15+ production-ready responsive web interfaces, translating complex high-fidelity Figma layouts into pixel-perfect, performance-optimized frontend code.
- Standardized core component-based UI architectures and design system foundations in Figma, reducing cross-team developer handoff friction and accelerating engineering implementation timelines by 25%.

- Designed and structured modular UI components within React and Vue development ecosystems; closely aligned production layouts with structural application state and routing architecture to eliminate design regressions.
- Developed premium, interaction-driven user experiences utilizing advanced CSS architectures and GSAP animations, increasing page-level user engagement across core client sites.
- Streamlined e-commerce frontend layouts across Shopify and WordPress platforms, improving mobile layout stability, responsive breakpoints, and visual hierarchy.
- Collaborated directly with cross-functional engineering teams to ensure clean code integration, solid version control practices, and long-term UI maintainability.

SELECTED PRODUCTION PROJECTS

JessaKae | UI/UX & Frontend Optimization

Engineered high-traffic responsive storefront interfaces using Tailwind CSS and rigid component logic; optimized asset payloads to maintain fluid user interactions and premium visual hierarchy.

PRYA & Eccotemp | E-commerce Core UI Development

Developed clean, modular UI layouts and custom theme interactions, ensuring cross-browser stability and highly accessible navigation across distinct product catalog systems.

Wipstitch & PetPads | Responsive Web Deployments

Designed and developed interaction-focused web layouts, mapping intuitive visual paths and user-friendly interface components to maximize conversion layouts.

EDUCATION

Diploma in Information Technology (Web Design)
Startup Institute | 2019 – 2020

LANGUAGES

- English: Professional Working Proficiency (Strong Reading & Writing)
- Hindi: Fluent
- Punjabi: Native

AVAILABILITY

Open to remote opportunities and international relocation.
