PROFESSIONAL SUMMARY

Frontend developer with 5+ years building and maintaining production e-commerce and marketing sites (Shopify, WordPress, BigCommerce) for 25+ live client brands, plus hands-on experience building component-based UI in React. Background in UI/UX design — translates Figma design systems into responsive, accessible, animation-driven interfaces (GSAP) with strong attention to visual detail and design-to-code accuracy. Uses Claude and Figma MCP for AI-assisted design-to-code and WordPress. Now building toward Frontend Engineer / Product Frontend Engineer roles where implementation skill and design judgment both matter.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), React.js, Next.js, TypeScript, HTML5, CSS3/SCSS, Tailwind CSS, Responsive Web Development, React Router

AI-Assisted Workflow: Claude, Claude Code, Figma MCP, WordPress patterns, CLI

Animation & Interaction: GSAP, ScrollTrigger, CSS Animations, Micro-interactions

APIs & Data: REST API integration, JSON, fetch/async-await, Recharts (data visualization)

Platforms / CMS: Shopify (Liquid), WordPress, BigCommerce

Design: Figma (Design Systems, Auto Layout, Component Tokens), Design-to-Code Handoff, Accessibility (WCAG basics)

Tools: Git/GitHub, Vercel (CI/CD Deployment), Chrome DevTools, Cross-Browser Debugging

PROFESSIONAL EXPERIENCE

UI Engineer / Frontend Developer — Tech Prastish Software Solutions Pvt. Ltd.
Sept 2020 – Present
Mohali, India

- Built and shipped production-ready, responsive web interfaces from high-fidelity Figma designs across client sites in the fashion, e-commerce, and industrial sectors, maintaining pixel-perfect accuracy across breakpoints.

- Turned Figma frames into code with Claude and Figma MCP and built WordPress block-pattern sites, reviewing all AI output by hand.

- Standardized reusable components and design-system foundations in Figma (tokens, auto layout), which the team credits with reducing developer handoff friction and accelerating implementation timelines.

- Built modular UI components in React, aligning component structure with application state and routing so design changes didn't cause layout regressions in production.

- Implemented scroll-based and interaction animations with GSAP to raise the perceived quality and engagement of client landing pages and product sites.

- Delivered and maintained e-commerce frontends on Shopify, WordPress, and BigCommerce, improving mobile layout stability and responsive breakpoint behavior across the catalog.

- Worked directly with engineering teams on code integration, Git workflow, and long-term UI maintainability across a live, multi-client codebase.

SELECTED LIVE PRODUCTION WORK

JessaKae (Shopify) — Fashion e-commerce frontend; responsive storefront, product browsing, and visual-storytelling layout built with Tailwind CSS.
🔗 jessakae.com

Prya · Eccotemp (Shopify / BigCommerce) — Core e-commerce UI: modular theme layouts, custom interactions, cross-browser and catalog navigation work.
🔗 prya.co.uk
🔗 eccotemp.com

Wipstitch · PetPads (Shopify) — Responsive storefront builds with a focus on conversion-oriented layout and navigation.

PERSONAL PROJECTS

LumaFrames (Next.js, TypeScript, Tailwind) — Photo-frame e-commerce UI with typed, reusable filter and gallery components, paginated product browsing, and a synced image gallery.
🔗 Luma-frames.vercel.app

GSAP Landing Page (GSAP, ScrollTrigger) — Interactive landing page built with scroll-based animations and smooth motion design.
🔗 serum-self.vercel.app

PulseFitCoach (HTML, CSS, JavaScript, GSAP) — Coaching landing page with a draggable before/after comparison slider and animated split-title reveals.
🔗 pulse-fit-coach.vercel.app

EDUCATION

Diploma in Information Technology (Web Design) — Startup Institute, 2019–2020
